

SKILL[®]

Surgical Instruments

EAR, NOSE AND THROAT INSTRUMENTS

SKILL® The World's Best Surgical Instruments

All **SKILL®** Instruments are manufactured on a three-pillar principle, namely raw material quality, skilled craftsmanship as well as precise and validated heat treatment and tempering.

Our goal is achieved by using German Forgings and German Steel for the production of our **SKILL®** Instruments. Using only German Craftsmanship, engineering and know-how throughout the manufacturing process along with the validated heat treatment is a necessity in the production of our **SKILL®** Instruments.

SKILL® Instruments are manufactured in Germany according to the EU Directive 93/42/EWG, as well as the following ISO Standards;

ISO: 9001
ISO:13458
ISO: 7153-1

No compromise is made on the quality of a **SKILL®** Surgical Instrument. The **SKILL®** short chain of supply allows clients to purchase the highest quality of Instrument at the most competitive pricing.

SKILL® Instruments offer the Surgeon a heightened sense of Instrument control allowing the Surgeon to greatly reduce the trauma and risk associated with Surgery.

OPERATE WITH SKILL®, OPERATE WITH US.

SKILL® Instruments carry a Lifetime warranty which covers any material defect or faulty manufacturing.

SKILL® Instruments will be repaired or replaced free of charge without compromise to the product in the event of a valid claim.

SKILL® Instruments are to be returned to the authorised distributor for maintenance, any work carried out by an authorised person will void the warranty.

No part of the Catalogue may be copied, forwarded or distributed without the express written consent given by the Manufacturer or its Distributor.

4K UHD Endoscopes

Technical Information:

- Special calculated optical system, based on highly refractive rod lenses and newest coating technology, guarantees an excellent picture sharpness and color reproduction.
- High performance glass fibers, individually selected according to the application, perform an outstanding light transmission. Laser welded casing (fiber) shoe allows an optimal adjustment of fiber cutting surface to the angle of view of the endoscope = homogenous and shadow-free illumination of the operating area.
- The use of high-quality and non-corrosive medical stainless steel in combination with state of the art laser welding technology are the solid base for a long-live cycle of the endoscope.
- Scratch resistant sapphire glasses on distal and proximal side are gold induction soldered and assure an absolute tightness of the optical system.
- All endoscopes and its components are serially tested for absolute tightness by an in-house developed Helium testing procedure.
- Processing:
 - Fully autoclavable at 134°C / 273°F up to 18 minutes
 - Approved for STERRAD® 100/200™, STERRAD® NX™ and STERIS (according to instruction manuals of corresponding manufacturers)

- 1 Gold induction soldered sapphire objective window or negative
- 2 Fiber optic with laser welded fiber shoe for optimal alignment of illumination fibers
- 3 Special calculated rod lens system
- 4 Stainless steel construction
- 5 Special corrosion free compression tightening technology
- 6 Gold induction soldered sapphire glass
- 7 Fiber optic is completely sealed against the optical system

Compatibility

All SKILL endoscopes are equipped as standard with compatible light guide adapters for all common cold light cables.

ACMI

4K UHD Endoscopes

Explanation Full HD | 4K

By the use of high-definition cameras in the endoscopy field, the resolution enlarges by 5 times, from 752 x 582 pixel (standard definition = SD) to 1920 x 1080 pixels (FULL HD), i. e. more than 2 million usable pixels, which results in a brilliant image quality and a higher level of detail. The new development of 4K UHD resolution of 3840 x 2160 pixels quadruples the the previous HD format and raises image quality to a new dimension. The SKILL 4K UHD camera is able to display the extended color space BT. 2020. This color space represents a much larger part of the spectrum perceptible to humans, while at the same time increasing color saturation (HD = BT. 709-5)

In combination with a 16:9 Wide screen HD 4K monitor, the user gets a natural panoramic view which is less fatigue than a picture in a square 4:3 format as the wider picture rather corresponds to the natural field of vision of humans. Thanks to this wide screen picture, an extended field of view is displayed and used instruments are faster visible in the lateral areas.

The increased picture information and contrast additionally enhance the three-dimensionality and depth perception of the picture which facilitates the orientation and the instrument handling inside the body as well as the diagnostic precision due to the fact that even finest structures such as tissue layers, blood vessels and nerve fibers are shown true to life in their different color nuances.

Due to the fact that a chain, in this case the optical chain consisting of endoscope, objective, light source, light cable, camera and monitor, is only as strong as its weakest link, all used components must support the HD | 4K UHD high resolution of the camera. Consequentially, AMNOTEC has equipped all standard endoscopes with a new calculated optical system based on high resolution glass rod lenses. In addition, objectives with a new 4K UHD lens-system have been developed. All 4K UHD optimized endoscopes and objectives are labeled with 4K-logo.

The HD | 4K UHD cameras have a lower sensitivity due to smaller pixel size and therefore require a high-energetic cold light source with daylight quality (color temperature: min. 6.000 K). We recommend our cold light source SKILLLIGHT Xenon 300 or our new developed LED light sources SKILL-LIGHT 1800 LED / 3000 LED.

Ratio 16:9 to 4:3 format

Ratio 4K

HD Resolution

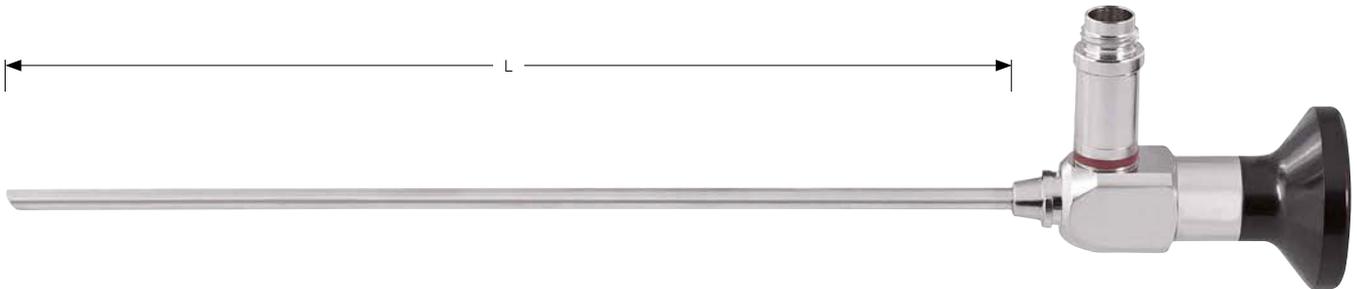

Explanation 4K UHD 3-Shaft Endoscopes

- High-quality, multi-coated (anti-reflective) optical system
- Outstanding optical transmission
- Highly refractive glass for optimum color rendering even under high magnification
- Exceptionally precise centering of optical and mechanical components for a brilliant, high-contrast image even around the edges
- Sealing of the optical system without using adhesive or elastomers but through laser welding and a special soldering process
- Triple-tube design for high bending resistance with many endoscopes
- Nitrogen-filled optical system to avoid interior fogging

Camera head with remote control (3 buttons) and cable

CH-047-10 HD

without objective

- 2.5 digital zoom
- Advanced image processor
- Accurate colour rendition
- Ergonomic waterproof camera head with remote function
- Six surgery presets for most common surgeries
- Keyboard input facility
- FREEZE-function for freeze of actual image on the monitor
- Anti-Moiré and Gain function (4 levels)
- Compatible to LED light source
- Fixed shutter mode for stroboscopy
- Foot switch connectivity (optional)
- Automatic White Balance

Technical Data:

Image-sensor:	1/3" High sensitive CCD
Resolution:	Full HD 1080p / 1080i / 720p Thru DVI
Video output:	DVI-D, RGB 2 x Y/C (S-Video), 2 x Composite
Peripheral output:	2
Power supply:	115 - 230 V / 50-60 Hz
Power consumption:	25 VA max.
Dimensions unit:	300 x 74 x 360 mm (WxHxD)
Weight unit:	approx. 4.5 kg
Weight camera head:	approx. 80 g
Safety class:	BF
Device classification:	I (acc. to MDD 93/42/EEC)
Applied standard:	IEC 60601-1

Included in delivery:

- Control unit
- Camera head with 3 m cable
- Mains cable
- Instruction manual
- BNC cable
- DVI cable

Portable 1 MOS HD Camera

AMNOCAM PORTABLE | HD

CH-015-00 HD 1 MOS, 1/3"

without objective

- Outstanding price-benefit ratio
- Full HD resolution
- High sensitivity requires less light from illumination
- Advanced image processing for better image quality
- Digital filters for use with fibre flexible scope
- Glass top on controller for easy cleaning
- Metal camera head housing for high durability
- Silicon cable for extra flexibility and sterilization stability

Camera head and cable

LED Cold Light Source

SKILL LIGHT MITHRAS | LED

CH-119-30

- Low noise cooling system
- More light with lower energy consumption
- Colour temperature of approx. 6.000 K equals the sunlight and guarantees an excellent aperture illumination as well as colour reproduction, especially in combination with our SKILL CAM endoscopy cameras
- Stepless controlled light intensity, which guarantees a constant high light quality
- No blackout times and costly lamp exchanges
- Automatic light intensity control via the output signal of a connected SKILL CAM endoscopy camera
- Exchangeable light guide adapter. Standard: SKILL / STORZ
- Ideal for all endoscopic interventions and diagnostic procedures

Technical Data:

Colour temperature:	6,000° K
LED Lifetime:	> 50,000 hrs.
Power supply:	100 - 240 V AC / 50/60 Hz
Power consumption:	max. 100 VA
Brightness control:	0-100% stepless adjustable
Light exit:	SKILL / STORZ
Video input:	1 x BNC (Video)
Dimensions:	325 x 74 x 365 mm (WxHxD)
Weight:	approx. 6.5 kg
Protection class:	IP x 1
Safety class:	BF
Standard:	IEC 606011, IEC 60601-1
Device classification:	Class I, acc. to MDD 93 / 42 / EEC

Included in delivery:

- LED Light source
- Mains cable
- BNC cable
- Instruction manual

Cold Light Cables

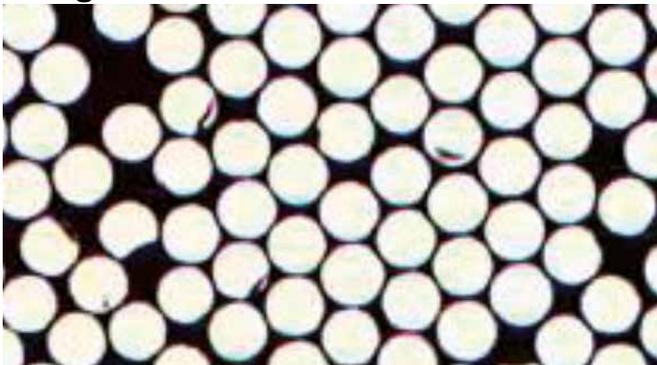

In our special cold light cables for Xenon and LED light sources, the glass fibres on the light entry are not any more clued but fused and pressed by means of a special and patented production procedure. Thereby the fibres are hexagonally deformed which allows an accurately fitting in the fibre bundle. The spaces in between disappear and the glass share adds up to 100%. The transmission increases proportionally by approx. 20% compared to standard cold light cables. In combination with the special convex lenses in our Xenon and LED cold light sources, a 50% higher light transmission can be achieved.

Since there are no organic adhesives anymore, these new fibre optic cables no longer burn at the light entry, which used to be a typical cause of failure with conventional cold light cables. The high-performance fibre optic cables are extremely temperature resistant at the point of light entry.

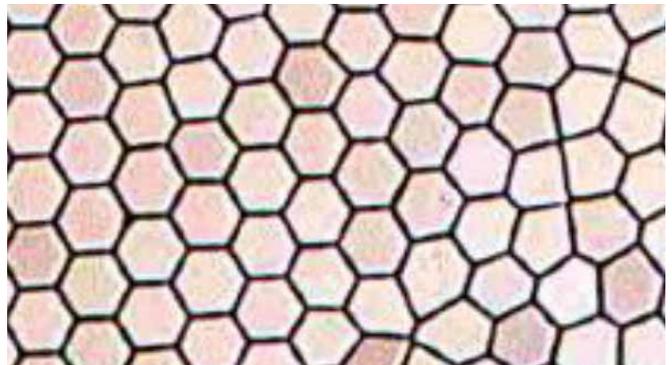

Different packing density of fused and clued cold light cables.

Halogen

Clued fibres (round)

XENON / LED

Fused fibres (hexagonal)

LED

Our new LED cold light cables with specially developed glass fibres have been designed and are fabricated for the use with state-of-the-art LED light sources. By enhancing the transmission effectiveness of an already well-established and first-choice fibre optic light cable, the light output and illumination - when operated with a LED light source together with a modern **HD | 4K** UHD endoscope - can be visibly and measurably increased.

Diagnostic Sets Juego

RI-SCOPE

CH-048-01

2,5 V

Diagnostic Set complete in case, consisting of:

- 1 Battery handle (without batteries)
- 1 Ophthalmoscope with Halogen Bulb , 2,5 V
- 1 Otoscope head with Halogen Bulb , 2,5 V
- 1 Reusable ear Specula, Ø 2,0 | 3,0 | 4,0 | 5,0 mm
- 3 Disposable ear Specula, Ø 2,5 | 4,0 mm
- 1 Magnifying glass for operation, 4 x
- 2 Spare Bulb , Halogen, 2,5 V

Diagnostic Sets Juero

RI-SCOPE

CH-048-02

2,5 V

Universal Diagnostic Set complete in case, consisting of:

- 1 Battery handle (without batteries)
- 1 Ophthalmoscope with Halogen Bulb , 2,5 V
- 1 Otoscope head with Halogen Bulb , 2,5 V
- 1 Nasal Specula with Bulb and magnifyer
- 1 Tongue depressor holder with Bulb
- 1 Lamp holder with Bulb
- 1 Laryngeal mirrors for lamp holder, Ø 20,0 | 22,0 mm
- 1 Reusable ear Specula, Ø 2,0 | 3,0 | 4,0 | 5,0 mm
- 3 Disposable ear Specula, Ø 2,5 | 4,0 mm
- 2 Spare Bulb , Halogen, 2,5 V

Diagnostic Sets Juero

RI-SCOPE

CH-048-05 2,5V

ENT Diagnostic Set complete in case, consisting of:

-
- 1 Battery handle (without batteries)
 - 1 Otoscope head with Halogen Bulb , 2,5 V
 - 1 Nasal Specula with Bulb and magnifyer
 - 1 Tongue depressor holder with Bulb
 - 1 Magnifying glass for operation, 4 x
 - 1 Reusable ear Specula, Ø 2,0 | 3,0 | 4,0 | 5,0 mm
 - 3 Disposable ear Specula, Ø 2,5 | 4,0 mm
 - 1 Spare Bulb , Halogen, 2,5V

RI-SCOPE LED

CH-048-07 2,5V

ENT Diagnostic Set complete in case, consisting of:

-
- 1 Battery handle (without batteries)
 - 1 Otoscope head LED, 2,5 V
 - 1 Nasal Specula with Bulb and magnifyer
 - 1 Tongue depressor holder with Bulb
 - 1 Magnifying glass for operation, 4 x
 - 1 Reusable ear Specula, Ø 2,0 | 3,0 | 4,0 | 5,0 mm
 - 3 Disposable ear Specula, Ø 2,5 | 4,0 mm

Diagnostic Sets Juero

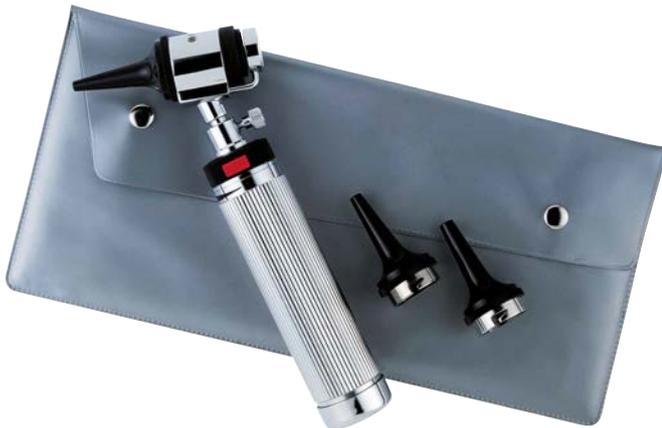

Otoscope Set complete in case, consisting of:

-
- 1 Battery handle (without batteries)
 - 1 Otoscope head with Halogen Bulb , 2,5V

Mirror Warmer/ Optics Heater

SKILL
Optics Instruments

CH-225-90

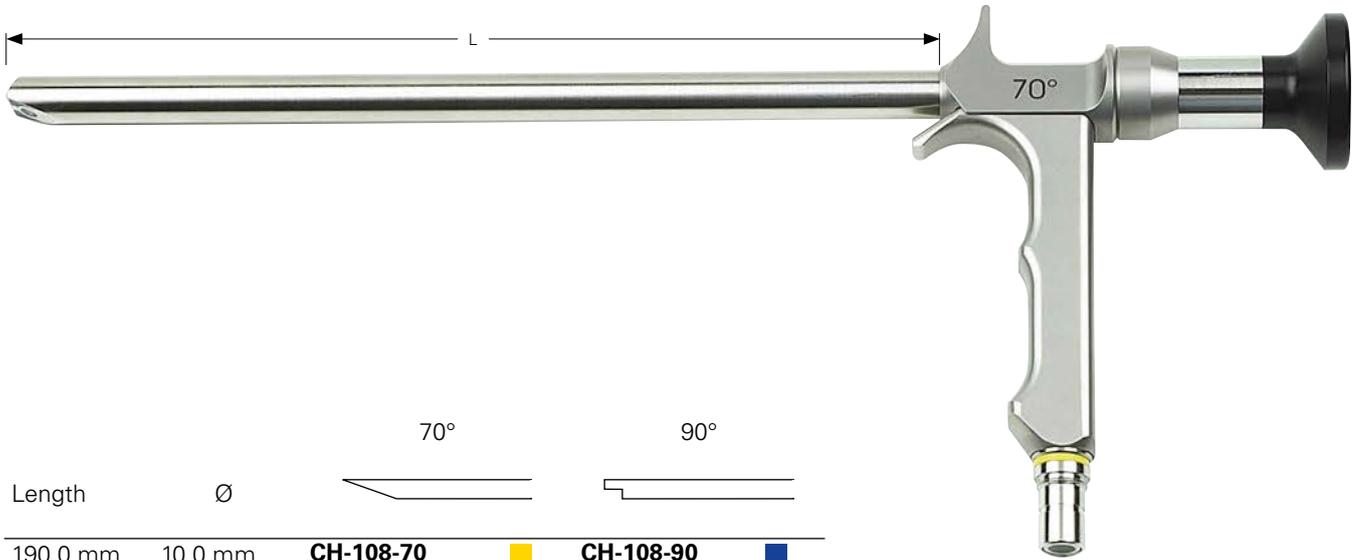

Infrared anti fog warmer for heating up mouth- and laryngeal mirrors or endoscopes.

Technical specification

Classification:	Class I (according annex IX 93/42/EWG)
Power supply:	Mains voltage 230 V
Power consumption:	35 W
Temperature at focus point:	approx. 300 °C
Switching time:	10 s
Dimension:	ø 86 x 140 mm

Laryngoscopes

Flexible Naso-Pharyngo-/ Laryngofibrescopes

Accessoires:
- Leakage tester
- ETO-Cap

CH-149-00 Ø 2,2 mm

One hand control, 2-side angulation, length of angulated tip 20 mm

Length	Fibre bundle	Angulation up down	Direction of view	Field of view	Depth of field
300 mm	6.500 Pixel	160° 160°	0°	88°	3 - 50 mm

CH-150-00 Ø 2,8 mm

One hand control, 2-side angulation, length of angulated tip 20 mm

Length	Fibre bundle	Angulation up down	Direction of view	Field of view	Depth of field
300 mm	16.000 Pixel	160° 160°	0°	85°	1 - 50 mm

CH-152-00 Ø 3,2 mm

One hand control, 2-side angulation, length of angulated tip 20 mm

Length	Fibre bundle	Angulation up down	Direction of view	Field of view	Depth of field
300 mm	16.000 Pixel	160° 160°	0°	85°	1 - 50 mm

CH-154-00 Ø 3,4 mm

One hand control, 2-side angulation, length of angulated tip 25 mm

Length	Fibre bundle	Angulation up down	Direction of view	Field of view	Depth of field
300 mm	16.000 Pixel	160° 160°	0°	85°	1 - 50 mm

Flexible Naso-Pharyngo-/ Laryngofibrescope with Instrument Channel

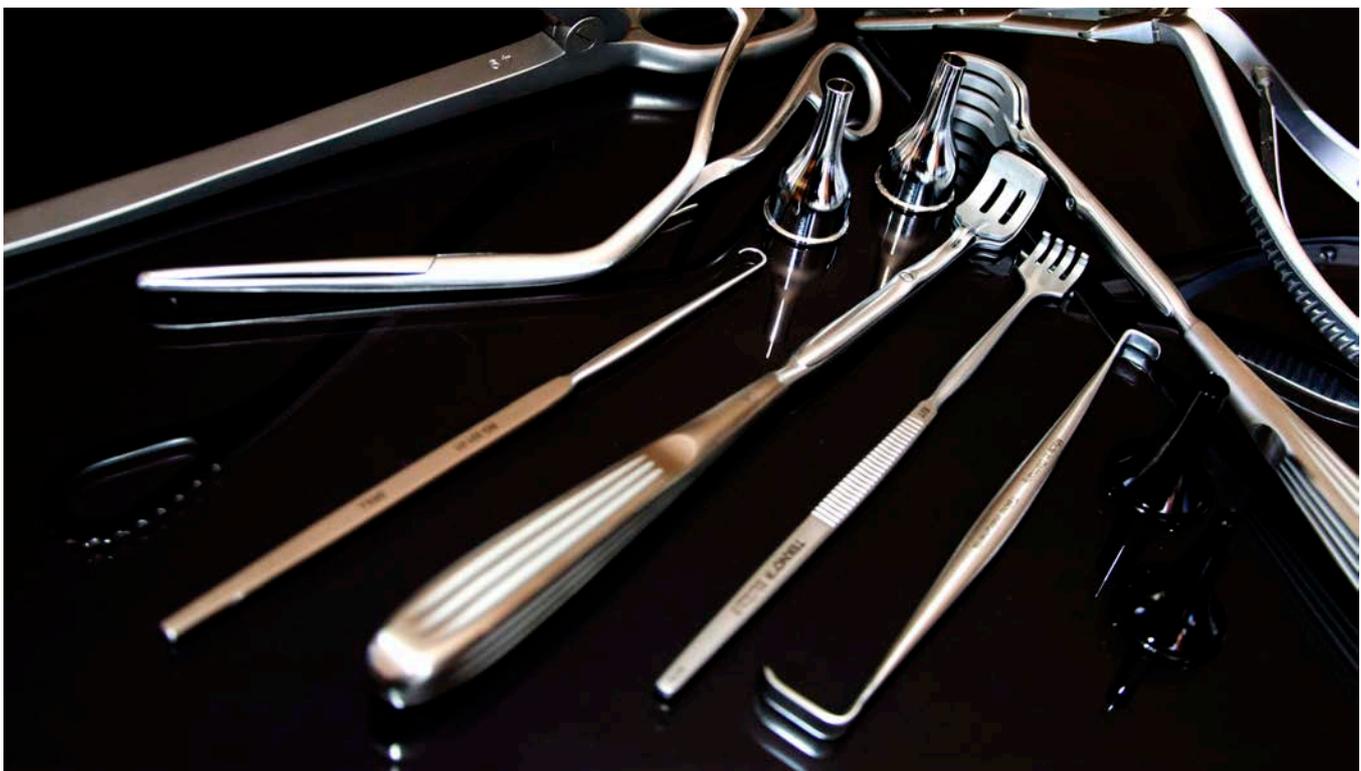

Accessoires:
 - Leackage tester
 - ETO-Cap

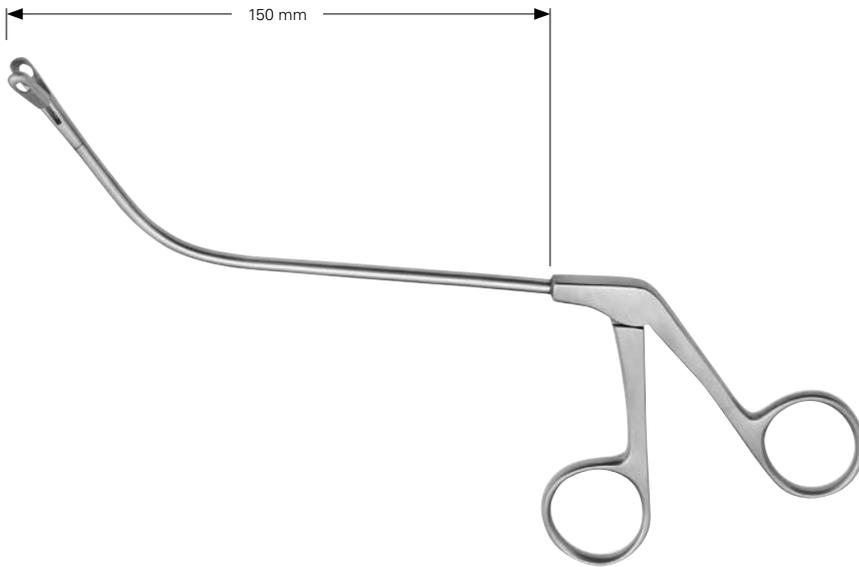

CH-156-00 Ø 3,8 mm

One hand control, 2-side angulation, length of angulated tip 20 mm, **instrument channel Ø 1.4 mm**

Length	Fibre bundle	Angulation up down	Direction of view	Field of view	Depth of field
300 mm	14.000 Pixel	160° 160°	0°	85°	3 - 50 mm

Infrared anti fog warmer for heating up mouth- and laryngeal mirrors or endoscopes.

Technical specification

Classification:	Class I (according annex IX 93/42/EWG)
Power supply:	Mains voltage 230 V
Power consumption:	35 W
Temperature at focus point:	approx. 300 °C
Switching time:	10 s
Dimension:	ø 86 x 140 mm

Needle Holders with Tungsten Carbide Inserts

Characteristic: golden rings

According to the field of application, there are various types of tungsten carbide inserts for TC needle holders:

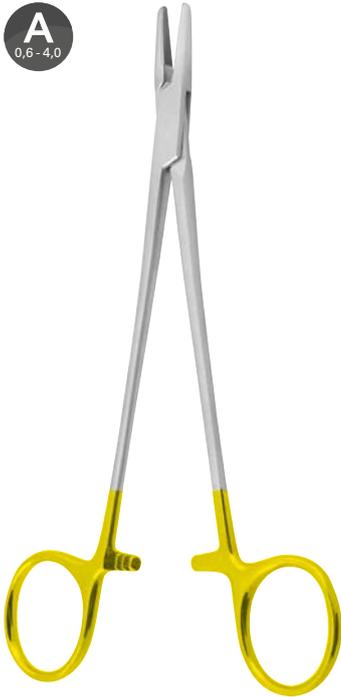

For suture material	Serration
	A 0,6 - 4,0 0,5 mm
	B 4,0 - 6,0 0,4 mm
	C 5,0 - 12,0 0,3 mm
	G 5,0 - 12,0 glatt smoth liso liscie

- Tungsten carbide inserts with precisely worked out structure guarantee a secure grip of the needle.
- Bevelled edges to prevent catching of suture material.
- Soft working catch provides safe handling.
